

ACCESSORIES LIST

Fix Coupler (Forged)

Heavy-duty right-angle coupler made from forged steel for maximum strength and durability in scaffolding connections.

Swivel Coupler (Forged)

Rotatable coupler ideal for angled scaffolding connections, made from high-grade forged steel.

Fix Coupler (Sheet Metal)

Economical right-angle clamp made from pressed steel, suitable for light to medium-duty applications.

Swivel Coupler (Sheet Metal)

Pressed steel coupler that enables angular joints, perfect for temporary structures.

Putlog Coupler

Used to connect putlog tubes to transoms or ledgers in traditional scaffolding.

Sleeve Coupler

Joins scaffold tubes end-to-end securely, maintaining structural integrity of vertical standards.

Spigot Pin / Joint Pin

Internally connects two vertical tubes, providing seamless vertical extension of standards.

Expanding Joint Pin

Expands internally using bolts to create a tight, secure connection between pipe joints.

Anchor Nut

Threaded nut for securing formwork tie rods, ensuring concrete form stability.

Beam Clamp

Heavy-duty clamp that attaches to steel beams to support scaffold or other fittings.
