

### ACCESSORIES LIST

#### Fix Coupler (Forged)

Heavy-duty right-angle coupler made from forged steel for maximum strength and durability in scaffolding connections.

#### Swivel Coupler (Forged)

Rotatable coupler ideal for angled scaffolding connections, made from high-grade forged steel.

#### Fix Coupler (Sheet Metal)

Economical right-angle clamp made from pressed steel, suitable for light to medium-duty applications.

#### Swivel Coupler (Sheet Metal)

Pressed steel coupler that enables angular joints, perfect for temporary structures.

#### Putlog Coupler

Used to connect putlog tubes to transoms or ledgers in traditional scaffolding.

#### Sleeve Coupler

Joins scaffold tubes end-to-end securely, maintaining structural integrity of vertical standards.

#### Spigot Pin / Joint Pin

Internally connects two vertical tubes, providing seamless vertical extension of standards.

#### Expanding Joint Pin

Expands internally using bolts to create a tight, secure connection between pipe joints.

#### Anchor Nut

Threaded nut for securing formwork tie rods, ensuring concrete form stability.

#### Beam Clamp

Heavy-duty clamp that attaches to steel beams to support scaffold or other fittings.

### CUPLOCK ACCESSORIES

#### Top Cup

Locks ledger blades at top junctions in Cuplock systems.

#### Bottom Cup

Base support for vertical standards in Cuplock scaffolding.

#### Ledger Blade

Connects ledgers to standards, held by top & bottom cups.
