

## ACCESSORIES LIST

### Fix Coupler (Forged)

Heavy-duty right-angle coupler made from forged steel.

### Swivel Coupler (Forged)

Rotatable coupler ideal for angled scaffolding connections.

### Fix Coupler (Sheet Metal)

Economical right-angle clamp made from pressed steel.

### Swivel Coupler (Sheet Metal)

Pressed steel coupler that enables angular joints.

### Putlog Coupler

Used to connect putlog tubes to transoms or ledgers.

### Sleeve Coupler

Joins scaffold tubes end-to-end securely.

### Spigot Pin / Joint Pin

Internally connects two vertical tubes.

### Expanding Joint Pin

Expands internally using bolts to secure pipe joints.

### Anchor Nut

Threaded nut for securing formwork tie rods.

### Beam Clamp

Clamps onto beams to support scaffold or fittings.

## CUPLOCK ACCESSORIES

### Top Cup

Used in Cuplock systems to lock ledger blades in place at the top junction.

### Bottom Cup

Supports vertical standards in Cuplock scaffolding systems from the base.

### Ledger Blade

Connects ledgers to vertical standards, held in place by top and bottom cups.
